Designed for sandy soils, SA filters are conically folded and have been optimized for use with the common extraction solutions used in soil nutrient analysis (Mehlich 1, Mehlich 3, Morgan, Modified Morgan, Bray, and Olsen). SA Filters provide the best combination of retention rating, filtration speed and purity requirements for soil nutrient testing (P, K, Ca, Mg). Medium filter retention.

Προδιαγραφές

Διάμετρος : 110 mm

Όγκος/Μέγεθος πακέτου : 50 /pk

Υλικό : Cellulose
